

Amendments to the Claims:

1. (canceled) A mouthpiece, barrel and reed table comprising:

a body having a mouthpiece and barrel section having at least one circular bore for supporting a wind instrument barrel and at least one circular extension for supporting a wind instrument mouthpiece; and having a reed table section having a tray portion having a reed area.

2. (currently amended) A mouthpiece, barrel and reed table comprising:

a body having a mouthpiece and barrel section having at least one circular bore for supporting a wind instrument barrel and at least one circular extension for supporting a wind instrument mouthpiece; and having a reed table section having a tray portion having a reed area and ~~The mouthpiece, barrel and reed table as recited in claim 1~~ wherein said reed section area includes a glass plate.

3. (original) The mouthpiece, barrel and reed table as recited in claim 2 and wherein said reed section area has an upper surface and wherein said glass plate has a side at least the same height as said upper surface.

4. (currently amended) A mouthpiece, barrel and reed table comprising:

a body having a mouthpiece and barrel section having at least one circular bore for supporting a wind instrument barrel

and at least one circular extension for supporting a wind instrument mouthpiece; and having a reed table section having a tray portion having a reed area ~~The mouthpiece, barrel and reed table as recited in claim 1~~ wherein said reed section area includes a upward sloped surface, in a direction near side of said mouthpiece, barrel and reed table, having a slope of from about 0.02 to about 0.03.

5.(currently amended)      The mouthpiece, barrel and reed table as recited in claim ~~1~~ 2 and wherein said at least one circular bore further comprises a plurality of circular bores.

6.(currently amended)      The mouthpiece, barrel and reed table as recited in claim ~~1~~ 2 and wherein said at least one circular extension further comprises a plurality of circular extensions.

7.(currently amended)      A mouthpiece, barrel and reed table comprising:

a body having a mouthpiece and barrel section having at least one circular bore for supporting a wind instrument barrel and at least one circular extension for supporting a wind instrument mouthpiece; and having a reed table section having a tray portion having a reed area ~~The mouthpiece, barrel and reed table as recited in claim 1~~ and wherein said at least one circular extension further comprises friction material attached to said at least one circular extension for firmly engaging a barrel.

8.(currently amended)     A mouthpiece, barrel and reed table comprising:

a body having a mouthpiece and barrel section having at least one circular bore for supporting a wind instrument barrel and at least one circular extension for supporting a wind instrument mouthpiece; and having a reed table section having a tray portion having a reed area ~~The mouthpiece, barrel and reed table as recited in claim 1~~ and wherein said body has a plurality of sides and wherein a line from an axis of said at least one circular extension to an axis of said at least one circular bore is angled with respect to at least one of said plurality of sides.

9.(currently amended)     A mouthpiece, barrel and reed table comprising:

a body having a mouthpiece and barrel section having at least one circular bore for supporting a wind instrument barrel and at least one circular extension for supporting a wind instrument mouthpiece; and having a reed table section having a tray portion having a reed area ~~The mouthpiece, barrel and reed table as recited in claim 1~~ and wherein said body has a base member which includes said reed area, and an upper member which includes said mouthpiece and barrel section.

10.(new)     The mouthpiece, barrel and reed table as recited in claim 4 and wherein said at least one circular bore further comprises a plurality of circular bores.

11.(new) The mouthpiece, barrel and reed table as recited in claim 4 and wherein said at least one circular extension further comprises a plurality of circular extensions.

12.(new) The mouthpiece, barrel and reed table as recited in claim 7 and wherein said at least one circular bore further comprises a plurality of circular bores.

13.(new) The mouthpiece, barrel and reed table as recited in claim 7 and wherein said at least one circular extension further comprises a plurality of circular extensions.

14.(new) The mouthpiece, barrel and reed table as recited in claim 8 and wherein said at least one circular bore further comprises a plurality of circular bores.

15.(new) The mouthpiece, barrel and reed table as recited in claim 8 and wherein said at least one circular extension further comprises a plurality of circular extensions.

16.(new) The mouthpiece, barrel and reed table as recited in claim 9 and wherein said at least one circular bore further comprises a plurality of circular bores.

17.(new) The mouthpiece, barrel and reed table as recited in claim 9 and wherein said at least one circular extension further comprises a plurality of circular extensions.
